

We **A**im to create **L**ong-term **T**echnology with **A**wareness of tomorrow
Eco-Friendly Connectivity Solutions for a sustainable future

Why do we need **Eco-Friendly** Products?

Protecting our planet is a responsibility we all share. With only one Earth, every step toward sustainability counts. Walta Electronic is proud to present our **eco-friendly charging cable series**, created to deliver dependable performance while reducing environmental impact.

Our cables are **GRS certified**, ensuring a comprehensive green supply chain and traceability. You can be confident that each cable contains a proportion of degradable and recycled materials, helping to lower the burden on the planet.

One of the key materials we use is **wheat straw bioplastic** — a natural by-product of wheat production. Instead of being discarded, wheat straw is transformed into a durable, biodegradable material that serves as an excellent alternative to traditional plastics. By adopting wheat straw, we not only minimize waste but also provide a cable solution with a **smaller carbon footprint**.

At Walta, we combine eco-conscious materials with precision manufacturing, offering cables that are sustainable, safe, and reliable.

Let's all do our part for the planet — connect smarter, connect greener.

 USB A to Lightning cable

 Type-C to Lightning cable

 Type-C to Type-C cable

 USB A to Type-C cable

 USB A to Micro USB cable

 USB A to Micro USB / Type C

Made of wheat straw

ECO-FRIENDLY Charging Cable

Wheat Straw Charging Cable Kit

Size: 8.6cm x 5.8cm x 1cm

Material: Wheat Straw

Current: 2.1A

Specifications:

- Type-C to Type-C Cable
- Type-C to Micro Connector
- Type-C to Lightning Connector
- Type-C to USB A Connector
- SIM Card Pin

Perfect cable kit for travel.
Only business card size. Very
convenient and easy-to-carry !
